Recovery - What is it?

Recovery is the belief in a person's ability to improve their quality of life and that there is hope for the future. It is about meeting and accepting people where they are at and accepting the pace at which they will move forward. These are our Recovery Values:

- **Hope** - recovery cannot occur without hope.
- **Empowerment** - providing individuals with opportunities to exercise control and power with respect to their own lives.
- **Self Determination** - individuals will make their own decisions about their life and continue to be in control of those decisions.
- **Working to Eliminate Prejudice and Discrimination** towards people with mental health and/or addiction issues.
- **Meaningful Choice** - all individuals are entitled to the dignity of risk that is inherent in making choices.

Recovery Centres

Self Help recovery centres provide a recovery-focused atmosphere that allows for learning, personal growth, coping and self-care strategies that enable one to experience life beyond a mental health and/or addiction issue. They provide the tools, materials and resources to assist individuals, in a self-help manner, to identify and develop strategies for taking on active roles in their own personal growth. They also provide recovery groups where individuals are given the opportunity to learn personal development skills from curriculum developed with the lived-experience perspective (see our website for monthly calendars).
